

Make a webpage that reads the JSON data from here:  
<https://radufromfinland.com/dogs/index.php>

Filter the data to keep **only** dogs that are 4 years old.

Display the result by modifying the code from the last lecture.  
The end result should look like this (not random):

## Dogs

 Charlie	 Kobe	 Bear	 Mac	 Charlie
 Cooper	 Kobe	 Mac	 Rex	 Oscar
 Mac	 Rex	 Teddy	 Oakley	 Kobe
 Chip	 Oscar	 Bailey	 Bear
