

Make a webpage that helps to calculate the hypotenuse of a right angle triangle with the other 2 sides given. The end result should look something like this:

## Pythagorean Theorem

a =

b =

c = 5.00

It must include:

1. A visual explanation (eg. an image you draw using a program of your choice).
2. Two input fields where the user can enter the input values
3. A button to do the calculation
4. A field where the output is displayed
